

Ad-Hoc add additional digital signatures in Acrobat DC

If a PDF has already been signed, but not set up for multiple signatures, follow these steps.

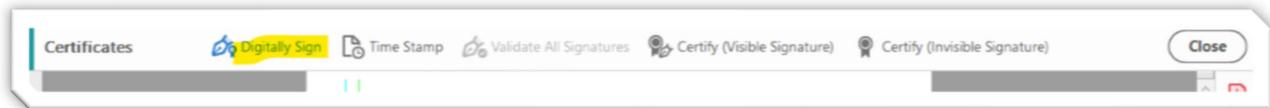

Navigate to the **Certificates** menu

This menu, aside from other items, lets you insert a digital signature. This will open a Certificates submenu along the top

Insert a new digital Signature

Select **Digitally Sign** and draw a box on the PDF where you want to place your digital signature.

Choose your preconfigured Digital ID.

Save the Document

After inserting, the PDF will automatically prompt you to save it with your new digital signature.
